

ELIZA REDMANN

SCULPTURAL ARTIST

Eliza@FoldedPoetry.com • www.FoldedPoetry.com • [@folded_poetry](https://www.instagram.com/folded_poetry)

Eliza Redmann is an architect, sculptural artist, and founder of Folded Poetry, where she innovates noise-reducing artwork for more beautiful and neuroinclusive spaces. Drawing on her background in architecture, she transforms simple forms into complex, mind-bending geometries that play with perception through light, color, texture, and shadow.

After a traumatic brain injury transformed how she experiences sound and the built environment, Eliza began exploring how acoustic treatment could become a featured part of a space rather than an eyesore or afterthought. Her sculptures draw from the persistent visual disturbances she still experiences while addressing the sensory challenges she now understands firsthand. Through her work, she offers others a glimpse into altered perception, raises awareness of invisible disabilities, and celebrates acoustic accessibility through art.
